

In my ideal world there would be world peace, less pollution, ^{no abuse} and people's actions would be only respectful, there will be no suffering and kindness. These things would make the world a better place. Now, I will tell you about how these things will ~~of~~ affect the ^{environ-} ~~ment~~ ment and the world would ~~be~~ be green like it was before !!

First, I'll talk about pollution. This is a big problem! So, first, I will lower the price of electric cars and ban any diesel or petrol cars will be ban. Factories will be reduced and this will cause less pollution. All materials will be reused and recycled. This is what ^{causes} ~~causes~~ bush-fires!

Now, I will talk about world peace. First, I'll tell ~~to~~ people to share land not fight for it. Politicians turn ^{people} ~~for~~ against each other ^{because} ~~because~~ they argue alot. To change this, Politicians need to happen more ^{uncommonly} ~~commonly~~.

The last thing that I will be talking about is abuse. This is a terrible thing right now. To change this, people will be told that ~~the~~ before they ~~say~~ ^{do} do what their going to do they need to ~~think~~ think about if they would like it if it happened to them.

I want to end this by saying that even though my world ~~isn't~~ ^{isn't} real I think that if we all work together we can make something similar to it.
